email: tony.dear@columbia.edu

Employment	Columbia University, Department of Computer Science Lecturer in Discipline Associate in Discipline	January 2019 - present July 2018 - December 2018
Education	Carnegie Mellon University, The Robotics Institute Doctor of Philosophy, Robotics - Thesis: Extensions of the Principal Fiber Bundle Model for Locomoting Robots Master of Science, Robotics	August 2018 May 2015
	University of California, Berkeley Bachelor of Science, Electrical Engineering and Computer Science (EECS)	May 2012
Teaching	Columbia University COMS 4701, Artificial Intelligence COMS 3251, Computational Linear Algebra CSOR 4200, Data-Driven Decision Modeling COMS 3203, Discrete Mathematics COMS 4701, Artificial Intelligence COMS 4701, Artificial Intelligence COMS 3251, Computational Linear Algebra COMS 4733, Computational Aspects of Robotics COMS 3251, Computational Linear Algebra COMS 4701, Artificial Intelligence COMS 4733, Computational Aspects of Robotics COMS 3251, Computational Linear Algebra COMS 4701, Artificial Intelligence COMS 3251, Computational Linear Algebra COMS 4701, Artificial Intelligence COMS 4733, Computational Aspects of Robotics COMS 3203, Discrete Mathematics COMS 4701, Artificial Intelligence	Spring 2023 Fall 2022 Summer 2022 Spring 2022 Fall 2021 Summer 2021 Spring 2021 Fall 2020 Spring 2020 Fall 2019 Spring 2019 Fall 2018
	Coursera Decision Making and Reinforcement Learning (instructor)	Spring 2023 to present
	Carnegie Mellon University 16-384, Robot Kinematics and Dynamics (online course developer)	Fall 2013 - Summer 2018
Leadership	Columbia Online Artificial Intelligence Executive Education Program Director CS@CU MS Bridge Program Director	
Grants	Collaboratory Fellows Fund Received \$100,000 over three years with Prof. Yi Zhang (Columbia IEOR) for the development of an interdisciplinary, data-driven decision-making course. The course covers ideas and examples from artificial intelligence and business analytics to give students a solid foundation in decision theory, dynamic programming, reinforcement learning, and model estimation. Applications include practice with real data sets for business analytics and a capstone project.	August 2020 - present
	Provost's Teaching and Learning Grant for MOOCs Received support and funding to develop a massive open online course (MOOC) on the subject of <i>Decision Making and Reinforcement Learning</i> with Columbia Video Network (CVN). This course teaches sequential decision making and reinforcement learning with an emphasis on theory and algorithms. Assessments include self-check questions, quizzes, and coding implementations.	June 2021 - present

Research

Columbia University

August 2018 - present

Currently pursuing research related to robot locomotion and reinforcement learning. We are interested in integrating geometric methods with model-based and model-free learning methods. Our ultimate goal is to develop locomoting robots that can learn in real time and in real life.

Carnegie Mellon University

September 2012 - August 2018

Advisor: Prof. Howie Choset. Expanded applicability of geometric methods for modeling and controlling locomoting systems, including wheeled, snake, and swimming robots. We applied intuitive motion planning techniques to systems that deviate from ideal conditions, such as those with passive joints or those that have to coordinate their degrees of freedom with environmental interactions. We also validated the newly established theory through experiments on simple but representative robots, such as a multi-link wheeled snake robot with compliant joints.

University of California, Berkeley

February 2011 - February 2012

Advisor: Prof. Stuart Russell. Developed and tested a seismic inference system in accordance with the Comprehensive Test Ban Treaty Organization (CTBTO) to detect nuclear explosions and seismic events worldwide; first system of its kind to use Bayesian inference. Implemented algorithms and computation through parallel and distributed computing on Amazon EC2, with results of up to 30 times speedup.

Fellowships

National Defense Science and Engineering Graduate (NDSEG) Fellowship 2014 - 2017
Jim & Donna Gray Endowment Award (UC Berkeley) 2011 - 2012

Service

Helped organize the inaugural Columbia Undergraduate Computer and Data Science Research Fair in Fall 2022

Advisor for Columbia undergraduate student groups, including Application Development Initiative (ADI) Labs and Columbia Space Robotics, as well as undergraduate and MS students on independent research projects

Reviewer for refereed journals, including MDPI Robotics, IEEE T-ASE, and NODY, and refereed conferences, including ICRA, IROS, CDC, ACC, DSCC, among others.

Mentor for undergraduate students (including international) participating in the Robotics Institute Summer Scholars (RISS) program to perform research in the laboratory.

Organized tour groups of Robotics Institute labs, including for K-12 students of the Big Brothers Big Sisters of Greater Pittsburgh program.
